VBASE Base Oils Certified Food Safe

With the entire line of VBASE base oils now registered NSF HX-1, VBASE Oil Company demonstrates its commitment to ensuring that all of its high performance, sustainable base oils are suitable for use in food safe lubricants.

“Being NSF registered base oils, these food compatible base stocks comply with requirements under HX-1 designations of NSF and the USDA for incidental food contact. They can be formulated into food grade lubricants for use in food producing, food packaging and drink filling equipment,” said Azelis Americas Industry Manager, Lubricants, Doug Hiple.

VBASE base oils are a new class of high-performance synthetic ester base oils that are biobased, biodegradable, non-toxic, and non-bioaccumulating. Available in ISO viscosity grades 32-100, VBASE® base oils provide compatibility with all major base oils and seals, easy formulation, and excellent solvency.

VBASE Oil Company President and CEO, Jeffrey DiMaio said, “*VBASE Oil Company believes that all oils produced should be safe for people and the planet. With our entire line of base oils registered HX-1, we are proud to demonstrate our continued commitment to providing safe, sustainable components for lubricants.*”
